Bachelor of Vocation
(B. Voc Computer Hardware & Networking Maintenance)

I

Choice Based Credit System

(Effective from July 2019-20)

The Bachelor in Vocation programme is divided into six semesters having 192 credits. Each semester has courses categorized under **General Education Components** and **Skill Development Components**.

Preamble:

University Grants Commission sanctions proposal of three year Bachelor programme in Vocation (B. Voc.) program which are being run at Ankushrao Tope College, Jalna affiliated by Dr. Babasaheb Ambedkar Marathwada University, Aurangabad from 2018-19. The curriculum design of this program is undertaken in the following framework-

- a) Although there has been remarkable progress in all sectors of education in last couple of decades, the less regulated area of the education sector-vocational training—seems to have lost its significance/importance. This has led to the widening gap between the supply and demand for skilled manpower across various industries and R&D organizations. This shortage of skills has translated directly into unemployment among an increasing number of graduates who pass-out every year and are forced to be re-trained in order to become marketable.

These programme are designed to produce skilled manpower so that wide variety of options in job sectors would be available and it will improve the opportunities for the unemployed youths in the country in both the private and public sectors.

- b) According to a study conducted by the Associated Chambers of Commerce and Industry of India (ASSOCHAM), there will be a deficit of 40 million working professionals by the year 2020 and the employers would face the difficulty of filling positions because of the dearth of suitable talent and skilled person.

These programme aim to provide concrete solution for these problems and would facilitate to improve:

- (i) **Quality of training**
 - (ii) **High drop-out rates**
 - (iii) **Linkages with Universities and Banking Sector**
 - (iv) **Inadequacy of resources**
- c) These programme are intended to offer practical training and skills needed to pursue an occupation straight away. It will provide options to the students to select the courses of their choice which are directly aligned to land a job in a chosen profession or a skilled trade. One of the end results of these programme is to enable an individual to attain self-employment.
