CO1: To understand the background of English literature and empower learners on its development.

CO2: To understand different aspects of research methodology.

CO3: To write research papers.

CO4: To understand new trends, movements in English literature.

Department of Economics

CO's Economics

FIRST SEMESTER

PAPER NO.:ECO101 : Micro Economics

On completion of this course, successful students will be able to:

CO1: Understands the meaning of economics.

CO2: Understands the concept of demand.

CO3: Identifies changes in demand elasticity.

CO4: Compare supply and demand.

PAPER NO.:ECO 102: Indian Economy

On completion of this course, successful students will be able to:

CO1: Understands the concept of Indian economy.

CO2: HDI and GDI supply can be compared.

CO3: Poverty line levels can be determined.

CO4: Understands changes in planning time.

SECOND SEMESTER

PAPER NO.: ECO103:Theory of Price

On completion of this course, successful students will be able to:

CO1: Understands the concept of product function.

CO2: Distinguishes between fixed price and changed price.

CO3: The short term and the long term can be compared.

CO4: Understands the concept of monopoly.

PAPER NO.: ECO104

TITLE OF THE PAPER:MONEY BANKING AND FINANCE

On completion of this course, successful students will be able to:

CO1: Understands the type of money.

CO2: Differences can be made in paper currency.

CO3: It differentiates between co-operative banks and other banks.

CO4: Understands the concept of class in quality.

THIRD SEMESTER

PAPER NO.: ECO105:Macro Economics

On completion of this course, successful students will be able to:

CO1: Microeconomics can be distinguished from material economics.

CO2: Understands national income.

CO3: Money can be priced.

CO4: Understands Fisher's concept.

PAPER NO.: ECO106:Economics of Development

On completion of this course, successful students will be able to:

CO1: Differentiates between growth and development.

CO2: Adam Smith understands his theory.

CO3: Understand the benefits of saving.

CO4: Agriculture and industrial development can be compared.

FOURTH SEMESTER

PAPER NO.: ECO 107: PUBLIC FINANCE

On completion of this course, successful students will be able to:

CO1: Understand Public Finance Concept.

CO2: Know the means of income.

CO3: Understands the concept of public spending.

CO4: There was information about what government spending was.

PAPER NO.: ECO108:Statistical Method

On completion of this course, successful students will be able to:

CO1: Understands the scope of statistics.

CO2: Concepts can be solved mathematically.

CO3: The average can be calculated mathematically.

CO4: Understands the concept of correlation coefficient

SEMESTER FIFTH

PAPER NO.: ECO- 109:International Economics

On completion of this course, successful students will be able to:

CO1: Knows how international trade works.

CO2: Analyzes fiscal concepts.

CO3: Explains the concept of monetary policy.

CO4: Compares international and interstate trade.

PAPER NO.: ECO-110:Agriculture Economics

CO1: Knows about agricultural policy.

CO2: Understands the relationship between other industries and agriculture.

CO3: Agriculture can contribute to economic development.

CO4: Understands the concept of agriculture and economic development.

PAPER NO.: ECO-111:History of Economic Thought

On completion of this course, successful students will be able to:.

CO1: Understand the financial considerations of a debit record.

CO2: Understands the concept of continents.

CO3: Understands the economics of the period.

CO4: Understand the types of workers

PAPER NO.: ECO-112:Project Work

On completion of this course, successful students will be able to:

CO1: There was information about the project.

CO2: Understands what research is all about.

CO3: Get information about graphs.

CO4: Creates a project plan.

SEMESTER SIXTH

PAPER NO.: 113:Research Methodology

On completion of this course, successful students will be able to:

CO1: Research is about knowing what it is.

CO2: The degree of elementary information can be compared to that of information.

CO3: Sources of information can be found.

CO4: Various techniques can be used.

PAPER NO.: 114:Industrial Economics

On completion of this course, successful students will be able to:

CO1: Understands the concept of industrial economics.

CO2: Understands the contribution of industry to the development of the country.

CO3: Post-1991 policy changes can be considered.

CO4: Understands what changes are needed in industrial policy.

PAPER NO.: 115:Indian Economics Thinker

On completion of this course, successful students will be able to:

CO1: Dr. Babasaheb understands Ambedkar's economic development.

CO2: The concept of Mahatma Gandhi comes to mind.

CO3: Indian economic thinkers got information about this.

CO4: .Compares the opinions of different thinkers.

PAPER NO.: 116: Project Work

On completion of this course, successful students will be able to:

CO1: Understand the elements required for a project.

CO2: Creates a real project.

CO3: Collects information.

CO4: Analyzes information.

Department of Geography

Cos : Geography

1. Elements of Physical Geography

After studying the course, the students become able ...

CO 1 – Explaining the Fundamentals of Physical Geogrpahy.

CO 2 - Understanding crustal mobility and tectonics; with special emphasis on their role in landform development.

CO 3 – Establishing the relationships between landforms, processes and underlying structure.

CO 4 – Overview and critical appraisal of landform development models

2. Human Geography

After studying the course, the students become able ...

CO 1 – Describing and analyzing the concepts of Human Geography.

CO 2 – Understanding the variations of global hydrological cycle.

CO 3 - Emphasizing the significance of groundwater quality and its circulation.

CO 4 – Studying the behavior and characteristics of the global oceans.

3. Geography of Land Form

After studying the course, the students become able ...

CO 1 - Understanding the fundamental principles of Geography of Land form.

CO 2 – Assessing the importance of economic activities around the world.

CO 3 – Discussing the locational factors for development of industries.

4. Regional Geography of Maharashtra

After studying the course, the students become able ...

CO 1 Understanding the dynamics of the Earth's atmosphere and regional climate of Maharashtra.

CO 2 - Explaining approaches to climate classification.

CO 3 - Assessing the role of man in global climate change.

CO 4 - Explaining the Pedological and Edaphological Approaches to Soil Studies.

CO 5 - Discussing processes of soil formation, types of soil, and principles of soil and land classification; and management.

CO 6 - Introducing ecosystem and biosphere concepts.

CO 7 - Analyzing the importance and role of biogeochemical cycles.

Practical

After studying the course, the students become able ...

CO 1 – Interpreting, reading, analyzing and identifying features from Geological and Topographical Maps.

CO 2 - Constructing scales and representing geographical data through Cartograms.

CO 3 - Identifying rocks and minerals and listing their properties.

CO 4 - Determining the area, the height and making of the plan of the land using dumpy level and prismatic compass in the field survey.

CO 5 – Drawing of maps with the help of map projections.

CO 6 – Using statistical techniques in order to summarize, represent, analyze and interpret data.

CO 7 - Training in the use Geographic Information System (GIS) softwares for contemporary mapping skills.

CO 8 – Analyzing and interpreting remotely sensed satellite images and aerial photographs in order to understand topographical and cultural variations on the Earth's surface.

CO 9 – Conducting field excursions and preparation of field report on research on problem in different areas of India.

Climatology

After studying the course, the students become able ...

CO 1 Understanding the dynamics of the Earth's atmosphere and regional climate of Maharashtra.

CO 2 - Explaining approaches to climate classification.

CO 3 - Assessing the role of man in global climate change.

CO 4 - Explaining the Pedological and Edaphological Approaches to Soil Studies.

CO 5 - Discussing processes of soil formation, types of soil, and principles of soil and land classification; and management.

CO 6 - Introducing ecosystem and biosphere concepts.

CO 7 - Analyzing the importance and role of biogeochemical cycles.

Population Geography

After studying the course, the students become able ...

CO 1 – Identifying habitable parts of the world and different global population dynamics.

CO 2 – Explaining the correlation between man and man-made structures on the natural landscape.

CO 3 – Analyzing the concept of regions and regionalization.

CO 4 – Understanding the detailed geography of India.

CO 5 – Studying typical physiographic, planning, arid and biotic regions of India.

CO 6 – Describing and analyzing the problems and consequences of unreliable rainfall, soil salinity, urban slums and SEZ delineation.

5. Oceanography

After studying the course, the students become able ...

CO 1 – Discussing the evolution of geographical thought from ancient to modern times.

CO 2 – Establishing relationship of Geography with other disciplines and man-environment relationships.

CO 3 - Analyzing modern and contemporary principles of Empiricism, Positivism, Structuralism, Human and Behavioural Approaches in Geography.

6. Physical Geography of India

After studying the course, the students become able ...

CO1. They can know about their own countries land formation, climate and natural vegetation.

CO2. They understand the economic resources of India.

CO3. They understand the social distribution of population of their country.

CO4. Develop an idea about regionalization of India.

GEOGRAPHY OF ENVIRONMENT

CO1. Gain knowledge about concept, scope of environmental geography and components of environment.

CO2. Develop an idea about human-environment relationships.

CO3. Build an idea about ecosystem.

CO4. Know about environmental programmes and policies.

Industrial Geography of Maharashtra

CO1. Gain knowledge about concept, scope of industrial geography and components of Maharashtra.

CO2. Develop an idea about human-industrial relationships.

CO3. Build an idea about ecosystem.

CO4. Know about environmental programmes and policies.

Practical

After studying the course, the students become able ...

CO 1 – Interpreting, reading, analyzing and identifying features from Geological and Topographical Maps.

CO 2 - Constructing scales and representing geographical data through Cartograms.

CO 3 - Identifying rocks and minerals and listing their properties.

CO 4 - Determining the area, the height and making of the plan of the land using dumpy level and prismatic compass in the field survey.

CO 5 – Drawing of maps with the help of map projections.

CO 6 – Using statistical techniques in order to summarize, represent, analyze and interpret data.

CO 7 - Training in the use Geographic Information System (GIS) softwares for contemporary mapping skills.

CO 8 – Analyzing and interpreting remotely sensed satellite images and aerial photographs in order to understand topographical and cultural variations on the Earth's surface.

CO 9 – Conducting field excursions and preparation of field report on research on problem in different areas of India.
